

WPtap Massive News V1.1 Setup & Usage Instructions

-For All WordPress PC Themes

Theme Requirements

-Before you go any further, please make sure you already have WordPress 2.9 or greater installed and configured.

-- If you already have any prior/other version of WPtap plugin installed and activated, please **deactivate/uninstall** it before going any further (Go to Plugin, and deactivate/uninstall). Please note WPtap Massive News v1.1 (For All PC Themes) is a standalone plugin, many new features have been added to it. To avoid conflicts, we only allow one WPtap plugin to be activated at the same time.

Theme Installation

- 1.Unzip the installation package and upload the entire '**wptap-massive-news**' folder to the WordPress "**~/your site/wp-content/plugins/**" directory on your webserver. (Please note: It is under the '**plugins**' folder, not the '**themes**' directory)
2. Log in WordPress Admin, navigate to the 'Plugins' tab, and activate the **WPtap Massive News Mobile** plugin.
3. Manage mobile theme settings under the two sections in 'Massive News Mobile' admin panel: **Mobile Devices** and **Theme Settings**.

Mobile Devices

In this section, you can see the mobile devices that are supported by WPTap Massive News Mobile. WPTap automatically detects mobile browsers and activates mobile themes. You can exclude certain devices by uncheck the checkbox next to it. You can also add your own device by entering the user agent.

Theme Settings

a. Site Logo section

You can upload your local image file to be used as your site logo. The site logo shows at the up left corner of your mobile site. (It is the 'Massive News Mobile' image by default). This must be a png file with size less than 256k.

b. iPhone Desktop Icon

The icon you choose here will appear on the iPhone screen when users bookmark your site. You can also upload your own icon; however, the image file has to be a 57x57px PNG file.

c. Header Menu Settings

Display/Hide Menu

Display/Hide Login

Select categories to be listed in the Category dropdown list.

Select pages to be listed in the Pages dropdown list.

d. Slideshow Setting

Select featured category and number of slides to show

e. Post Thumbnail Options

Hide thumbnails by checking the checkbox next to the options. More details regarding how to insert a thumbnail image can be found in the next section of this document.

f. Post Setting on Homepage

Show/Hide 'Comments', 'Date', and 'Category' on post entries

Single Posts Setting

Show/Hide 'Comments', 'Date', and 'Category'

Single Pages Setting

Show/Hide 'Date' and 'Author'

g. Social Bookmark Setting

Display/Hide 'Bookmark', 'Rss', 'Email', 'Facebook', 'Twitter'

h. Footer Setting

You can set up your footer by entering the text you wish to display.

i. Google Analytics Configuration

At here you will set up the Google Analytics for mobile site. Simply copy and paste the code, and upload the ga.php file to your server as indicated.

j. Ads Setting

Enter your ads script/codes and choose to display it on homepage/post/pages.

Thumbnail Options (IMPORTANT)

Custom Thumb Field

- Login to your WordPress admin, and add/edit a page/post.
- Click on the Insert Image icon, above the editing box.
- Upload your desired image for use as a thumbnail (it is recommended that you upload an image with the minimum size of 50x50).

- Once you have successfully uploaded your image, click on File URL and copy the URL that is generated at the Link URL field.
- Create a custom field with the name set as '**thumb**' (default) and paste the URL into the value field.
- Update your post and your chosen image will be assigned as the post thumbnail.

Slideshow

Wptap plugin automatically pulls thumbnail pictures that you added following the above steps, and use it in the slideshow. So all you need to do is to add thumbnail pictures, and make sure the size is above 320x130. Then go to 'Slideshow Setting' demonstrated above and turn it on.
