

## News Press Plugin/Theme Setup & Usage Instructions-Version 2.0

### Theme Requirements:

-Before you go any further, please make sure you already have WordPress 2.6 or greater installed and configured.

- If you already have any prior/other version of Wptap plugin installed and activated, please **deactivate/uninstall** it before going any further (Go to Plugin, and deactivate/uninstall). Please note Wptap News Press 2.0 is a standalone plugin, many new features have been added to it. To avoid conflicts, we only allow one Wptap plugin to be activated at the same time.

### Theme Installation

1. Unzip the installation package and upload the entire '**wptap\_news\_press**' folder to the WordPress '**~/your site/wp-content/plugins/**' directory on your webserver. (Please note: It is under the '**plugins**' folder, not the '**themes**' directory.)
2. Log in WordPress Admin, click "Plugins" and select "Activate" next to the News Press to activate it.
3. Manage mobile theme settings under the two sections in "News Press" admin panel: **Mobile Devices** and **Theme Settings**.

### Mobile Devices:

-You will be able to set mobile devices that News Press theme will automatically be turned on when detected. If you check the '**Always On**' checkbox at top, News Press theme will be activated on both PC and mobile devices.

-By default, we listed some widely-used mobile devices, i.e., iPhone/iPod Touch, Android, Blackberry Storm, and Nokia S60+. In the meantime, user can also add mobile devices to the list by entering the Name and Agent of the mobile devices.

## **Theme Settings**
