

WPtap Pages Setup & Usage Instructions - Version 2.0

Theme Requirements

- Before you go any further, please make sure you already have WordPress 2.9 or greater installed and configured.
- If you already have any prior/other version of WPtap plugin installed and activated, please **deactivate/uninstall** it before going any further (Go to Plugin, and deactivate/uninstall). Please note WPtap Pages is a standalone plugin, many new features have been added to it. To avoid conflicts, we only allow one WPtap plugin to be activated at the same time.

Theme Installation

1. Unzip the installation package and upload the entire '**wptap-pages**' folder to the WordPress '**~/your site/wp-content/plugins/**' directory on your webserver. (Please note: It is under the '**plugins**' folder, not the '**themes**' directory)
2. Log in WordPress Admin, navigate to the 'Plugins' tab, and activate the **WPtap Pages** plugin.
3. Manage mobile theme settings under the two sections in 'WPtap Pages' admin panel: **Mobile Devices** and **Theme Settings**.

Mobile Devices

- You will be able to set mobile devices that Wptap Pages theme will automatically be turned on when detected. If you check the '**Always On**' checkbox at top, Wptap Pages theme will be activated on both PC and mobile devices.

- By default, we listed four types of mobile devices, i.e., iPhone/iPod Touch, Android, Blackberry Storm, and Nokia S60+. These devices have been thoroughly tested by our team/beta testing group. In the meantime, user can also add mobile devices to the list by entering the Name and Agent of the mobile devices.

Theme Settings

You will be able to manage the following theme settings under this section.

a. Global Settings:

- Home Page Title
- Title Text Color: Click on the box, a color palette will appear.
- Site Icon: Select or upload site icon/logo (PNG file, less than 256k)
- iPhone Desktop Icon (57x57 PNG file)
- Theme Style: Blue, Black, and Purple
- Post Thumbnail Options: In this version, both our legacy method (Custom Thumb Field) and WP Post Thumbnails method (Requires WordPress 2.9+) are fully supported. More details regarding how to insert a thumbnail image can be found in the next section of this document.

b. Bookmark Setting

User can choose to add Twitter, Facebook, and Myspace Link to Bookmark Menu. Please enter the URL when you select a bookmark.

c. Menu Setting

Display/hide 'Home', 'Search', 'Login'

Page Setting

Display/hide 'Date', 'Author'

Post Setting

Display/hide 'Date', 'Category', 'Author', 'Tags'

d. Slideshow Setting

Enter the number of slides to show on front page

e. Ads Setting

Add Admob, Google AdSense, or your own ads script, and select the area it shows on your mobile site. Please note that Ads will only show on top on home page. (A Google AdSense for mobile is recommended)

Instructions (IMPORTANT)

1. Thumbnail Options:

Wptap Legacy Method (Custom Thumb Field)

- Login to your WordPress admin, and add/edit a page/post.
- Click on the Insert Image icon, above the editing box.
- Upload your desired image for use as a thumbnail (it is recommended that you upload an image with the minimum size of 50x50. If you are featuring this page/post in the slideshow, the recommended minimum size is 350 x 130).
- Once you have successfully uploaded your image, click on File URL and copy the URL that is generated at the Link URL field.
- Create a custom field with the name set as '**thumb**' (default) and paste the URL into the value field.
- If done correctly, the image should appear on Wptap theme as a thumbnail for your page/post.

WP Post Thumbnails Method (WordPress 2.9+ Required)

- Login to your WordPress admin, and add/edit a page/post.
- Look for Post Thumbnail box or Featured Image box (**WordPress 3.0+**) in the WordPress editor view on the right side.
- In this box click on the *Set Thumbnail link* or *Set Featured Image* and the usual Add Media dialogue will pop up where you can choose an image from your Computer, URL or Media Library. At the end of the dialogue for the selected image there's a new link beside the Insert into Post button called *Use as thumbnail* or *Use as featured image*.

- Click this and your chosen image will be assigned as the page/post thumbnail.

2. Slideshow Instruction

Wptap Pages Theme allows setting ANY image you want to display in the slideshow. User can simply add a custom field name **'featuredimage'** (default) and paste the URL of your desired image for use as slideshow into the value field (Please make sure the size is above 350x130). Then go to 'Slideshow Setting' demonstrated above and turn it on.

3. Show/Hide pages on home page

If you want to show a page on your homepage, simply add a custom field named **'showpage'** (default) and set the value to be **'yes'**.

4. Ordering pages on home page

Wptap Pages makes it easy to re-order your pages at your will. Simply go to add/edit pages, set the **Order** attribute of each page. The pages will appear in an ascending order on home page, i.e., 0-1-2-3-4....

5. Creating a Page Link to Posts

You can create a page link to all posts through 'Reading Settings' under Settings in your Admin Panel.
